NAME

regression-380 − regression test for BUG#380

#380 manpage writer does not add space after .B

... somewhere in the sphinx pipeline something is ... failing

Maybe the **install** subparser is a problem.

Input extracted with standard argparse −−−

usage: tmpmain.py [−h] [−−general GENERAL] foo bar {install} ...

positional arguments:

foo foo help bar {install}

System Message: ERROR/3 (input/optionstoo.txt:, line 23)

Unexpected indentation.

install install help

optional arguments:

−h, **−−help**
show this help message and exit

−−general *GENERAL*, **−G** *GENERAL*
General option

−o *FILE*, **−−ouput** *FILE*
output file

NOTE "show" "General" and "output" on same column.
